

To: Licensees -- MetroGIS Regional Street Centerline Datafile

From: Randall Johnson
MetroGIS Staff Coordinator (651-602-1638)

Subject: Datafile Enhancement Update

Date: December 22, 1998

On June 3rd, representatives from over 30 licensees of MetroGIS endorsed regional street centerline datafile participated in a forum at which 23 enhancements were suggested for this datafile. The purpose of this letter is to update you on progress made to address the suggested enhancements and to notify you that the December 1, 1998 release of the datafile is available. Please review the enclosed Version 2.4 announcement from The Lawrence Group (TLG), dated December 1, 1998, for an explanation of the enhancements included in the current release.

A brief description of each of the 23 enhancements suggested at the June 3rd forum is listed in the enclosed table. TLG has completed or is in process of completing 8 of the requested enhancements and has completed or is in process of completing six other enhancements in addition to those identified at the June 3rd forum. The MetroGIS Technical Advisory Team will be investigating the feasibility of the remaining 15 suggested enhancements and developing a recommendation for how to handle each as part of its 1999 work program. If you have any interest in participating in this effort, please contact Theresa Foster, MetroGIS Technical Coordinator at <theresa.foster@metc.state.mn.us> or at 651-602-1638.

Have a safe and happy holiday season.

cc: Jim Maxwell, Vice President
The Lawrence Group
